

### PRODUCT INFORMATION

### T20 Standard Harness T20 IP Harness

#### T20 STANDARD HARNESS

Wide support webbing makes extended periods of work aloft possible. Leg and shoulder straps ensure security and "D" rings are provided at waist level for the carriage of tools.

High and low suspension points, as well as work positioning attachments at waist level, make this a rugged and versatile tool for rope-access applications.

The T20 IP is identical in specification to the standard T20 except that it has comfort pads.

Fibre Identity Polyester

Triangular screw-gate fittings are not included

#### T20 & T20 IP

The Willans T20 Harness is manufactured under the ISO 9001:2000 quality system and is one of the "T" range of Tree Surgeon Harnesses.

It is outstanding in that it fulfils the requirements of three separate European Standards:

- BS EN 813 (Sit Harness)
- BS EN 358 (Work Positioning Systems)
- BS EN 361 (Full Body Harness)
