

PRODUCT INFORMATION T22/2 SB Harness

The Willans T22/2 SB Tree Surgeons Harness is manufactured under the ISO 9001:2000 quality system.

It meets the requirements of EN 813 (Sit Harness) as well as EN 358 (Work Positioning Systems).

The harness is fitted with work positioning triangles for use with pole strop. Crutch straps provide additional security, and “D” rings are provided at waist level for the carriage of tools.

The addition of the new hard wearing stainless steel sliding bar suspension point, offers greater manoeuvrability without compromising overall weight.

Stiffened wide back pad offers support and comfort for the user during long periods aloft.

The T22/2 SB harness is available in three sizes small, standard and large.
