

### PRODUCT INFORMATION

### T24/2000 Offshore Harness

#### T24/2000

The Willans T24/2000 Harness is manufactured under the ISO 9001:2000 quality system.

It fulfils the requirements of three separate European standards:-

BS EN 813 (Sit Harness)  
BS EN 358 (Work Positioning Systems)  
BS EN 361 (Full Body Harness)

The T24/2000 is equipped with waist level suspension for working aloft. It has attachment points for work positioning lanyards, as well as a dorsal "D" ring for rescue and fall arrest. Smaller "D" rings at waist level are provided for carriage of tools. It is equipped with snaphook and ring fastenings for ease of donning when wearing gloves.

At the request of major offshore users, shoulder adjusting straps and their buckles have been fitted with rings and webbing loops. This makes for easier adjustment with gloved hands.

The wide expanded neoprene back-pad of the "2000" is now self-aligning, resulting in a more comfortable sitting position.

Fibre identity polyester.

Triangular screw-gate fitting is included.
